For the attention of Markus Rochel

TeAratika have been involved with the Hobsonville Deviation Project for HEB Construction since the beginning of this year. In this year we have developed a very strong relationship with TeAratika. This strong relationship has helped deliver successfully, well in excess of 45km of ducting ranging from 32mm Telecom Ducting to 355 Watermain pipe.

With a high emphasis on Health and Safety, Quality and productivity we have been fortunate to enjoy very few remedial actions on this project, and have enjoyed the comfort and knowledge that TeAratika also have all the relevant service authorities' respect.

It is my recommendation that TeAratika are more than capable of managing and delivering similar type projects.

Yours Sincerely

Anthony Hellyer  
Utilities Engineer  
Hobsonville Deviation  
HEB Construction
