To Whom It May Concern:

**Performance Assessment**

Below please find North Shore City Council's assessment of Te Aratika Drilling's recent work:

1. Temporary Traffic Management  
The design and implementation of the temporary management plans to ensure site safety was achieved to a very good standard.
2. Site Management  
Unattended sites were especially well managed.
3. Production  
Drilling/Ducting - achieved a high production rate on a regular basis.
4. Public Relations  
The public advice was very good.
5. Response to Issues  
Callouts were responded to promptly and the follow up actions completed without reminders and to satisfactory outcomes.
6. Restoration  
Code of Practice Standards continually met, with final site-visits being arranged to complete the audit process.

The following projects completed within the last year merit commendation:

1. Vector Datacom Project;
2. Vector Forrest Hill to Sunset Road High Voltage Connection;
3. MUSH Communication Rollouts Portions of Pocket 1,7&11 (MUSH - Municipalities, Universities, Schools, Hospitals).

The RON team Utilities Engineers are Don Somerville, Balvant Dullabh and Jack Huriwai. All were involved and endorse the performance assessment.

Please note that this is, thus far, the only endorsement issued by the RON team.

A handwritten signature in blue ink that reads "B. Dullabh".

Balvant Dullabh  
**Acting Utilities Team Leader**  
**Transport Infrastructure**
